77  Progress in Genetics and Genomics of Nonhuman Primates
   John D. Harding

82  Great Ape Genomics
   Jeffrey D. Wall

91  The Value of Extended Pedigrees for Next-Generation Analysis of Complex Disease in the Rhesus Macaque
   Amanda Vinson, Kamm Prongay, and Betsy Ferguson

106 Baboons as a Model to Study Genetics and Epigenetics of Human Disease
    Laura A. Cox, Anthony G. Comuzzie, Lorena M. Havill,
    Genesio M. Karere, Kimberly D. Spradling, Michael C. Mahaney,
    Peter W. Nathanielsz, Daniel P. Nicolella, Robert E. Shade,
    Saroja Voruganti, and John L. VandeBerg

122 Systems Biology of the Vervet Monkey
    Anna J. Jasinska, Christopher A. Schmitt, Susan K. Service,
    Rita M. Cantor, Ken Dewar, James D. Jentsch, Jay R. Kaplan,
    Trudy R. Turner, Wesley C. Warren, George M. Weinstock,
    Roger P. Woods, and Nelson B. Freimer

144 Improving Genome Assemblies and Annotations for Nonhuman Primates
    Robert B. Norgren

154 Nonhuman Primate Models in the Genomic Era: A Paradigm Shift
    Eric J. Vallender and Gregory M. Miller

166 Old World Monkeys and New Age Science: The Evolution of Nonhuman Primate Systems Virology
    Robert E. Palermo, Jennifer Tisoncik-Go, Marcus J. Korth, and Michael G. Katze
181  The Essential Detail: The Genetics and Genomics of the Primate Immune Response
Shu Shen, Chul-Woo Pyo, Quyen Vu, Ruihan Wang, and Daniel E. Geraghty

196  Haplessly Hoping: Macaque Major Histocompatibility Complex Made Easy
Roger W. Wiseman, Julie A. Karl, Patrick S. Bohn, Francesca A. Nimityongskul, Gabriel J. Starrett, and David H. O’Connor

211  Progress and Prospects for Genetic Modification of Nonhuman Primate Models in Biomedical Research
Anthony W. S. Chan

224  In Transition: Primate Genomics at a Time of Rapid Change
Jeffrey Rogers

234  IACUC Review of Nonhuman Primate Research
Suzette D. Tardif, Kristine Coleman, Theodore R. Hobbs, and Corrine Lutz
